

EMS Integration with Partners:

Note: All data portrays EMS external interfaces and transactions exchanged for 12 months via integration methods **MQ, Web service** and **FTP File**

System name	Description
Information and eGovernment Authority	The system integration between expats management system and IGA system is designed for issuing personal number (CPR) for each expat electronically and without human intervention.
Electronic Visa System - National, Passport, and Residency Affairs - Ministry of Interior	The system integration is designed to send the work permit request to NPRA system for security checks, then an approval and a visa to enter the country will/will not be issued.
Residency Permit System - National, Passport, and Residency Affairs - Ministry of Interior	The system integration allows issuance of residency permits electronically for the expat after entering the country.
Pre-Employment Health check System - Ministry of Interior	The system integration is designed for booking the medical examination appointment electronically after the expat enters the country. The Result is then sent to LMRA "EMS".
Sijillat System - Ministry of Industry and Commerce and Tourism	The system integration is designed to synchronize all business information records electronically between the two systems without human intervention.
Electricity and Water Authority System	The integration is designed to receive electricity bill details for all CRs electronically.
Social Insurance Organization System	The system integration is designed to send a notification from the Expat Management System to the Social Insurance Organization System once the expat enters the country. The insurance from work injuries and unemployment starts directly.
